Japanese Pharmacopoeia

Potassium Sulfate

Item	Unit/Symbol	Specified value
Content (K ₂ SO ₄) (after drying)	%	Not less than 99.0
Description	—	To comply with the monograph (See note below)
Identification	—	To pass test
Purity (1) Clarity and color of solution, and acid or alkali	—	To pass test
Purity (2) Chloride	%	Not more than 0.028
Purity (3) Sodium	—	To pass test
Loss on drying	%	Not more than 1.0
Blank below		
Note: Description Potassium Sulfate occurs as colorless crystals or a white, crystalline powder. It has a slightly saline, somewhat bitter taste. It is soluble in water and practically insoluble in ethanol (95).		

Notes:

1. “%” and “ppm” are in mass fraction.
2. Items, specified value, the test method and the terms in the list are based on the expression in the Japanese Pharmacopoeia. However, for the sake of testers' safety, some parts of the description test are omitted.
3. With revision of The Japanese Pharmacopoeia, some parts of the contents above may be updated without prior notification.

Notice: This English Version of the Japanese Pharmacopoeia is published for the convenience of users unfamiliar with the Japanese language. When and if any discrepancy arises between the Japanese original and its English translation, the former is authentic.
